Subject Index of Volume 137

Al_2O_3
Preparation and evaluation of Al_2O_3 plastic forming feedstock with partially water soluble polymer as a binder, 128
AlSi7Mg alloy
The formation of rosette α phase, structural evolution during the reheating and semi-solid casting of AlSi7Mg alloy, 195
Al–Si–Pb alloys
Microstructure and mechanical properties of spray-formed Al–Si–Pb alloys, 164
Alumina
Influence of temperature on the colloidal processing of electrostatically stabilised alumina suspensions, 102
Aluminum alloy
The microstructure and mechanical properties of spray-deposited hypereutectic Al–Si–Fe alloy, 191
Aluminum matrix composite
Research on microstructure and properties of aluminum-matrix composite fabricated by spray deposition, 168
Ammonia
Preparation of fine particles of tin–M (M: silver, bismuth) alloys with ammonia splashing method, 123
Atomization
Formation mechanism of the pressure zone at the tip of the melt delivery tube during the spray forming process, 5

$BaTiO_3$
The orientational growth of grains in doped $BaTiO_3$ PTCR materials by microwave sintering, 100
Bimetallic pipe
Fabrication of composite pipes by multi-billet extrusion technique, 10
Binder
Fabrication of composite pipes by multi-billet extrusion technique, 10
Extrusion moulding of hard-metal powder using a novel binder system, 21

CAD
Computer-aided die design for axis-symmetric cold forging products by feature elimination, 138
CAPP
Computer-aided die design for axis-symmetric cold forging products by feature elimination, 138
Cast IN718 superalloy
An investigation on fine-grain formation and structural character in cast IN718 superalloy, 35
Ceramic
Solid free-forming of ceramics using a continuous jet printer, 49
Ceramic plastic forming technology
Preparation and evaluation of Al_2O_3 plastic forming feedstock with partially water soluble polymer as a binder, 128
Chromium
Sandwich rolling of sintered compacts of pure chromium, 117
Cold forging
Computer-aided die design for axis-symmetric cold forging products by feature elimination, 138
Composites
Composites fabricated by self-propagating high-temperature synthesis, 30
Compressible
Effect of a cylindrical shroud on particle conditions in high velocity oxy-fuel (HVOF) spray process, 214
Conductivity
A high strength and high conductivity copper alloy prepared by spray forming, 60
Controlled cooling
Grain refinement of a Nb–Ti microalloyed steel through heavy deformation controlled cooling, 173
Copper alloy
A high strength and high conductivity copper alloy prepared by spray forming, 60
Crystallinity
Synthesis and photocatalytic properties of fibrous titania by solvothermal reactions, 45

Debinding
A new type of binder for metal injection molding, 70
Die casting
The formation of rosette α phase, structural evolution during the reheating and semi-solid casting of AlSi7Mg alloy, 195
Dies
Computer-aided die design for axis-symmetric cold forging products by feature elimination, 138
Directional solidification
Research on the non-linear temperature field of molten metal shaped by an electromagnetic field in DS processing, 145
Dual-frequency
Research on the dual-frequency electromagnetic shaping of liquid metal, 204
Ductile-to-brittle transition temperature (DBTT)
Sandwich rolling of sintered compacts of pure chromium, 117

Elastic tool
Flexible punching method using an elastic tool instead of a metal punch, 151
Electrolytic method
A new electrolytic method of preparing ultrafine metallic powders, 201
Electromagnetic shaping
Research on the non-linear temperature field of molten metal shaped by an electromagnetic field in DS processing, 145
Research on the dual-frequency electromagnetic shaping of liquid metal, 204
Electromagnetic stirring
The formation of rosette α phase, structural evolution during the reheating and semi-solid casting of AlSi7Mg alloy, 195

Elsevier Science B.V.
PII: S0924-0136(03)00563-6

Electroplastic effect
The engineering application of the electroplastic effect in the cold-drawing of stainless steel wire, 96
Element model
Element modeling of FEM on the pressure field in the powder injection mold filling process, 74
Eulerian formulation
Effect of a cylindrical shroud on particle conditions in high velocity oxy-fuel (HVOF) spray process, 214
Expert system
Computer-aided die design for axis-symmetric cold forging products by feature elimination, 138
Extrusion process
The study of primary Si phase in spray forming hypereutectic Al–Si alloy, 183

Feedstock
The rheology of metal injection molding, 132
FEM
Element modeling of FEM on the pressure field in the powder injection mold filling process, 74
Fibrous titania
Synthesis and photocatalytic properties of fibrous titania by solvothermal reactions, 45
Flexible punching
Flexible punching method using an elastic tool instead of a metal punch, 151
Flow behavior
Viscoelasticity and flow behavior of irradiation grafted nano-inorganic particle filled polypropylene composites in the melt state, 208
Flow stress
Superplastic properties of Inconel 718, 17
Foil
Single roll method for foil casting of the aluminum alloy, 86
Free-form fabrication
Solid free-forming of ceramics using a continuous jet printer, 49
Functionally graded materials
An advanced model for plasma spraying of functionally graded materials, 110

Grain formation
An investigation on fine-grain formation and structural character in cast IN718 superalloy, 35
Grain refinement
Grain refinement of a Nb–Ti microalloyed steel through heavy deformation controlled cooling, 173

Hard-metal
Extrusion moulding of hard-metal powder using a novel binder system, 21
Heavy deformation
Grain refinement of a Nb–Ti microalloyed steel through heavy deformation controlled cooling, 173
High velocity oxy-fuel
Effect of a cylindrical shroud on particle conditions in high velocity oxy-fuel (HVOF) spray process, 214
Hydrogen
Thermal debinding processing of 316L stainless steel powder injection molding compacts, 65
Hydrothermal
Study of fine silver powder from AgOH slurry by hydrothermal techniques, 55
Hydrothermal technique
Microstructures and photoluminescence of barium titanate nanocrystals synthesized by the hydrothermal process, 78
Hypereutectic
TiC particulate-reinforced Al–20Si–5Fe composite fabricated by melt in situ reaction spray forming, 187
Hypereutectic Al–Si alloy
The study of primary Si phase in spray forming hypereutectic Al–Si alloy, 183

Inconel 718
Superplastic properties of Inconel 718, 17
ITO
Preparation of indium tin oxide (ITO) with a single-phase structure, 82

Jet printing
Solid free-forming of ceramics using a continuous jet printer, 49
Joining strength
Research on press joining technology for automotive metallic sheets, 159

LAVA model
An advanced model for plasma spraying of functionally graded materials, 110
Liquid metal
Research on the dual-frequency electromagnetic shaping of liquid metal, 204
Liquid phase co-spray forming
Microstructure and mechanical properties of spray-formed Al–Si–Pb alloys, 164

Martensite
The engineering application of the electroplastic effect in the cold-drawing of stainless steel wire, 96
Matrix-reinforcement
TiC particulate-reinforced Al–20Si–5Fe composite fabricated by melt in situ reaction spray forming, 187
Mechanical properties
Research on the technology and the mechanical properties of the microwave processing of polymer, 156
Microstructure and mechanical properties of spray-formed Al–Si–Pb alloys, 164
The microstructure and mechanical properties of spray-deposited hypereutectic Al–Si–Fe alloy, 191
Melt delivery tube
Formation mechanism of the pressure zone at the tip of the melt delivery tube during the spray forming process, 5
Melt spinning
Single roll method for foil casting of the aluminum alloy, 86
Metal injection molding
A new type of binder for metal injection molding, 70
The rheological and sintering behavior of W–Ni–Fe nano-structured crystalline powder, 177
Metal–ceramic composites
Fabrication of composite pipes by multi-billet extrusion technique, 10
Metallic sheets
Research on press joining technology for automotive metallic sheets, 159
Microalloyed steel
Grain refinement of a Nb–Ti microalloyed steel through heavy deformation controlled cooling, 173
Microstructure
Microstructure and mechanical properties of stainless steel produced by centrifugal-SHS process, 1
Microstructures and photoluminescence of barium titanate nanocrystals synthesized by the hydrothermal process, 78
The microstructure and mechanical properties of spray-deposited hypereutectic Al–Si–Fe alloy, 191

Microstructure property
Research on microstructure and properties of aluminum-matrix composite fabricated by spray deposition, 168
Microstructure-prefiring
Influence of temperature on the colloidal processing of electrostatically stabilised alumina suspensions, 102
Microwave curing
Research on the technology and the mechanical properties of the microwave processing of polymer, 156
Microwave sintering
The orientational growth of grains in doped $BaTiO_3$ PTCR materials by microwave sintering, 100
MIM
The rheology of metal injection molding, 132
Multi-billet extrusion
Fabrication of composite pipes by multi-billet extrusion technique, 10

Nanocrystal barium titanate
Microstructures and photoluminescence of barium titanate nanocrystals synthesized by the hydrothermal process, 78
Nano-powder
The rheological and sintering behavior of W–Ni–Fe nano-structured crystalline powder, 177

Orientational growth
The orientational growth of grains in doped $BaTiO_3$ PTCR materials by microwave sintering, 100

Partial remelting
The formation of rosette α phase, structural evolution during the reheating and semi-solid casting of AlSi7Mg alloy, 195
Particle size
Preparation of fine particles of tin–M (M: silver, bismuth) alloys with ammonia splashing method, 123
Photocatalytic property
Synthesis and photocatalytic properties of fibrous titania by solvothermal reactions, 45
Photoluminescence
Microstructures and photoluminescence of barium titanate nanocrystals synthesized by the hydrothermal process, 78
Planar flow casting
Single roll method for foil casting of the aluminum alloy, 86
Plasma spraying
An advanced model for plasma spraying of functionally graded materials, 110
Polymer
Research on the technology and the mechanical properties of the microwave processing of polymer, 156
Polypropylene composite
Viscoelasticity and flow behavior of irradiation grafted nano-inorganic particle filled polypropylene composites in the melt state, 208
Powder
Fabrication of composite pipes by multi-billet extrusion technique, 10
Powder extrusion moulding
Extrusion moulding of hard-metal powder using a novel binder system, 21
Powder injection molding
Element modeling of FEM on the pressure field in the powder injection mold filling process, 74
Powder injection molding (PIM)
Thermal debinding processing of 316L stainless steel powder injection molding compacts, 65
Preparation
Preparation of ultrafine MnO_2 powders by the solid state method reaction of $KMnO_4$ with Mn(II) salts at room temperature, 25
A new electrolytic method of preparing ultrafine metallic powders, 201
Press joining
Research on press joining technology for automotive metallic sheets, 159
Pressure field
Element modeling of FEM on the pressure field in the powder injection mold filling process, 74
Pressurization
Formation mechanism of the pressure zone at the tip of the melt delivery tube during the spray forming process, 5
Primary Si phase
The study of primary Si phase in spray forming hypereutectic Al–Si alloy, 183
Process planning
Computer-aided die design for axis-symmetric cold forging products by feature elimination, 138
Properties
Microstructure and mechanical properties of stainless steel produced by centrifugal-SHS process, 1
Protonic layered tetratitanate
Synthesis and photocatalytic properties of fibrous titania by solvothermal reactions, 45

Rapid solidification
Single roll method for foil casting of the aluminum alloy, 86
Recrystallization
Sandwich rolling of sintered compacts of pure chromium, 117
Reinforcing filler
Preparation of modified ultra-fine mineral powder and interaction between mineral filler and silicone rubber, 40
Rheology
Influence of temperature on the colloidal processing of electrostatically stabilised alumina suspensions, 102
The rheology of metal injection molding, 132
Roll casting
Melt ejection twin roll caster for the strip casting of aluminum alloy, 92

Sandwich rolling
Sandwich rolling of sintered compacts of pure chromium, 117
Saturated magnetization
The engineering application of the electroplastic effect in the cold-drawing of stainless steel wire, 96
Self-propagating high-temperature synthesis (SHS)
Composites fabricated by self-propagating high-temperature synthesis, 30
Semi-solid metal
The formation of rosette α phase, structural evolution during the reheating and semi-solid casting of AlSi7Mg alloy, 195
SHS-centrifugal
Microstructure and mechanical properties of stainless steel produced by centrifugal-SHS process, 1
Silicone rubber
Preparation of modified ultra-fine mineral powder and interaction between mineral filler and silicone rubber, 40
Silver hydroxide
Study of fine silver powder from AgOH slurry by hydrothermal techniques, 55
Single frequency
Research on the dual-frequency electromagnetic shaping of liquid metal, 204

Single phase
Preparation of indium tin oxide (ITO) with a single-phase structure, 82
Single roll
Single roll method for foil casting of the aluminum alloy, 86
Slid phase reaction at room temperature
Preparation of ultrafine MnO_2 powders by the solid state method reaction of $KMnO_4$ with Mn(II) salts at room temperature, 25
Slip casting
Influence of temperature on the colloidal processing of electrostatically stabilised alumina suspensions, 102
Solvothermal reaction
Synthesis and photocatalytic properties of fibrous titania by solvothermal reactions, 45
Splash
Preparation of fine particles of tin–M (M: silver, bismuth) alloys with ammonia splashing method, 123
Spray deposition
Research on microstructure and properties of aluminum-matrix composite fabricated by spray deposition, 168
Spray forming
A high strength and high conductivity copper alloy prepared by spray forming, 60
The study of primary Si phase in spray forming hypereutectic Al–Si alloy, 183
Sputtering
Preparation of indium tin oxide (ITO) with a single-phase structure, 82
Stainless steel
Microstructure and mechanical properties of stainless steel produced by centrifugal-SHS process, 1
Strain rate
Superplastic properties of Inconel 718, 17
Strength
A high strength and high conductivity copper alloy prepared by spray forming, 60
Strip casting
Melt ejection twin roll caster for the strip casting of aluminum alloy, 92
Structural character
An investigation on fine-grain formation and structural character in cast IN718 superalloy, 35
Superplasticity
Superplastic properties of Inconel 718, 17
Surface modification
Preparation of modified ultra-fine mineral powder and interaction between mineral filler and silicone rubber, 40
Suspensions
Influence of temperature on the colloidal processing of electrostatically stabilised alumina suspensions, 102

Temperature field
Research on the non-linear temperature field of molten metal shaped by an electromagnetic field in DS processing, 145
Tensile strength
Sandwich rolling of sintered compacts of pure chromium, 117
Thermal curing
Research on the technology and the mechanical properties of the microwave processing of polymer, 156
Thermal debinding
Extrusion moulding of hard-metal powder using a novel binder system, 21
Thermal debinding processing of 316L stainless steel powder injection molding compacts, 65
Thermodynamics
Study of fine silver powder from AgOH slurry by hydrothermal techniques, 55
TiC particulate
TiC particulate-reinforced Al–20Si–5Fe composite fabricated by melt in situ reaction spray forming, 187
Tin–bismuth alloy
Preparation of fine particles of tin–M (M: silver, bismuth) alloys with ammonia splashing method, 123
Tin–silver alloy
Preparation of fine particles of tin–M (M: silver, bismuth) alloys with ammonia splashing method, 123
Twin roll caster
Melt ejection twin roll caster for the strip casting of aluminum alloy, 92

Ultra-fine crushing
Preparation of modified ultra-fine mineral powder and interaction between mineral filler and silicone rubber, 40
Ultrafine metallic powders
A new electrolytic method of preparing ultrafine metallic powders, 201
Ultrafine MnO_2
Preparation of ultrafine MnO_2 powders by the solid state method reaction of $KMnO_4$ with Mn(II) salts at room temperature, 25
Urethane sheet
Flexible punching method using an elastic tool instead of a metal punch, 151

Vacuum
Thermal debinding processing of 316L stainless steel powder injection molding compacts, 65
Value of *m*
Superplastic properties of Inconel 718, 17
Viscoelasticity
Viscoelasticity and flow behavior of irradiation grafted nano-inorganic particle filled polypropylene composites in the melt state, 208

Water soluble polymeric binder
Preparation and evaluation of Al_2O_3 plastic forming feedstock with partially water soluble polymer as a binder, 128
Wax–oil–polyethylene binder
A new type of binder for metal injection molding, 70
W–Ni–Fe alloy
The rheological and sintering behavior of W–Ni–Fe nano-structured crystalline powder, 177
